Bengaluru, Karnataka • +91 9942366236 • gokulpy27@gmail.com

Full Stack Developer

With 3+ years in web development, skilled in React.js, Node.js, Express.js and MongoDB. Experienced in building responsive UIs, increasing user engagement by 30%. Proficient in Agile workflows, conducting code reviews, and version control. Delivered projects on time in collaborative environments.

WORK EXPERIENCE

Associate Software Engineer
Unisys India Private Limited • Bengaluru • 08/2022 - Present

- Develop and enhance scalable web applications using React.js, Node.js, and TypeScript, ensuring maintainability and performance.
- Design responsive, user-friendly interfaces, boosting user engagement by 30%.
- Conduct code reviews to uphold quality, readability, and optimization standards.
- Collaborate in Agile workflows (sprint planning, stand-ups, retrospectives) to deliver projects on time.
- Leverage Bitbucket for version control, streamlining team collaboration.

Student Intern
Unisys India Private Limited • Bengaluru • 11/2021 - 08/2022

- Built responsive layouts with HTML5 and CSS3, ensuring cross-browser and mobile compatibility.
- Developed React-based UIs with reusable components and efficient state management.

Developer Intern
V Scaleup (Startup) • Pondicherry • 09/2021 - 11/2021

- Contributed to React.js and Redux-based web applications, improving responsiveness and usability.
- Implemented interactive front-end features for seamless cross-device experiences.
- Managed project repositories using GitHub and GitLab, enhancing team coordination.

Developer Intern
TATA Consultancy Services (TCS) • Chennai • 05/2021 - 08/2021

- Developed dynamic web applications using Angular.js and Vue.js, focusing on intuitive UIs.
- Maintained and optimized software functionality for peak performance.
- Adapted to diverse frameworks throughout the full development lifecycle.

EDUCATION

B.Tech. in Computer Science and Engineering

Sri Manakula Vinayagar Engineering College • Pondicherry • GPA: 7.6/10

PROJECTS

Network Security Configuration Portal

Internal Product | Unisys

Description: Collaborated on an internal network security portal to streamline configuration of networks, creation of subnetworks, and role-based access control (RBAC). Built reusable React.js components for an intuitive UI, enabling administrators to manage network settings and assign user roles efficiently. Integrated RESTful APIs with front-end components to ensure seamless data flow and occasionally developed back-end features using Node.js, Express.js, and MongoDB for secure data persistence. Improved configuration efficiency by 25% through optimized UI and API interactions.

Technologies: React.js, Node.js, Express.js, MongoDB, REST APIs, CSS3, Bitbucket.

React-Based Movie Review Platform

Personal Project

Description: Developed a movie review app with React.js, integrating TMDB API for dynamic data.
Improved load speed by 20% using lazy loading and memoization.

Technologies: React.js, REST APIs, HTML5, CSS3, GitHub.

Weather Dashboard with React Hooks

Personal Project

Description: Built a real-time weather app using React hooks and OpenWeatherMap API with dynamic UI features.
Achieved 95% user satisfaction in testing through responsive design.

Technologies: React.js, Hooks, REST APIs, HTML5, CSS3, Git.

SKILLS

Frontend: React.js, HTML5, CSS3, Javascript, Redux

Backend: Node.js, Express.js, REST APIs, Flask

Database: MongoDB, MySQL

Other: Git, GitHub, Bitbucket, Agile
